

Practice Software Solutions

PURPOSEFUL ACTIONS EQUALS SUCCESS

Integrated financial and clinical management.

Executive Summary

The DBS Practice Management (PM) solution is a web-based application that enables physician practices to achieve greater efficiency by:

- Streamlining front desk processes to eliminate redundancies
- Optimizing first pass claims
- Monitoring provider contracts
- Substantially reducing work on follow-up efforts
- Assessing and measuring staff and provider performance

The DBS EMR is a fully integrated electronic medical record (EMR) solution that supports both the clinical and the administrative sides of a physician practice by:

- Automating clinical workflows
- Strengthening the patient-physician experience
- Simplifying the physician experience with pharmacies, labs, hospitals, and payers

PM Key Features

This online application features a sophisticated infrastructure within a simple user experience:

- No Database to maintain (Insurance, ICD-9/CPT codes, NPI, etc.)
- Dashboard navigation and management tools
- Verifying eligibility automatically at every step of patient scheduling and registration
- Scrubs outgoing claims prior to submission, maximizing your “pay at first pass”
- Automatically queries payers daily to check claim status
- Monitors contracts for underpayment
- Automates PQRI prompting and reporting
- Routes issues to billing staff and managers, ensuring accountability at all levels
- Easy access from any secure web-connected device

EMR Key Features

With the DBS EMR, your providers can introduce a new method of managing tasks that streamlines the work and provides them with the comfort of knowing that there is accountability to address patient issues promptly

- Processes prescription refill requests 24 hours a day
- Qualifies prescribers for Medicare’s electronic prescribing bonus
- Monitors, measures, and escalates all clinical messages
- Provides chart summaries, flow sheets, registry flags, and clinical notes
- Gives caregivers the option to use voice, point and click, and text
- Allows transition to EMR without working more hours or sacrificing revenue
- Easy access from any secure web-connected device

An innovative approach which connects practices with key stakeholders, monitors your workflow with supportive knowledge and rules, offers an easy-to-use application experience, and provides support services.
